Christian Houdré Named IMS Fellow

Christian Houdré, Professor, of the Georgia Institute of Technology and Université Paris XII was named Fellow of the Institute of Mathematical Statistics (IMS). The induction ceremony took place July 28, 2004 at the IMS Annual Meeting in Barcelona, Spain.

Professor Houdré received the award for his outstanding work in the theories and applications of non-stationary, non-Gaussian processes, wavelet transforms, and isoperimetric inequalities.

Each Fellow nominee is assessed by a committee of his/her peers for the award. In 2004, after reviewing 37 nominations, 12 were selected for Fellowship. Created in 1933, the Institute of Mathematical Statistics is a member organization which fosters the development and dissemination of the theory and applications of statistics and probability. The IMS has 3800 active members throughout the world. Approximately 10% of the IMS membership has earned the status of fellowship.
