

- Geometry on the set of probability measures. Funded by the Analysis Program, National Science Foundation for the period July 01 2006- June 30 2009, \$ 204,000, DMS-06-00791.
- The Monge-Kantorovich theory in kinetic theory. Funded by the Analysis Program, National Science Foundation for the period 2002-06, \$ 101,000, DMS-02-00267.
- Applications of the Monge-Kantorovich theory and Michell trusses. Funded by the Modern Analysis Program, National Science Foundation for the period 1999-04. \$97,000. DMS-99-70520
- The Monge Problem and the Calculus of Variations. Funded by the Modern Analysis Program, National Science Foundation for the period 1996-2000. \$63,000, DMS-96-22734. Supplementary funds of \$25,245 awarded on January 1998 to support an ROA visiting researcher from Spelman College. DMS-96-22734
